

ALUCOBOND®

naturAL BEAUTY

Metallic surfaces with personality

COMPOSITES

Olympic Village | Canada | Architect: Nick Milkovich Architects Inc. | naturAL brushed

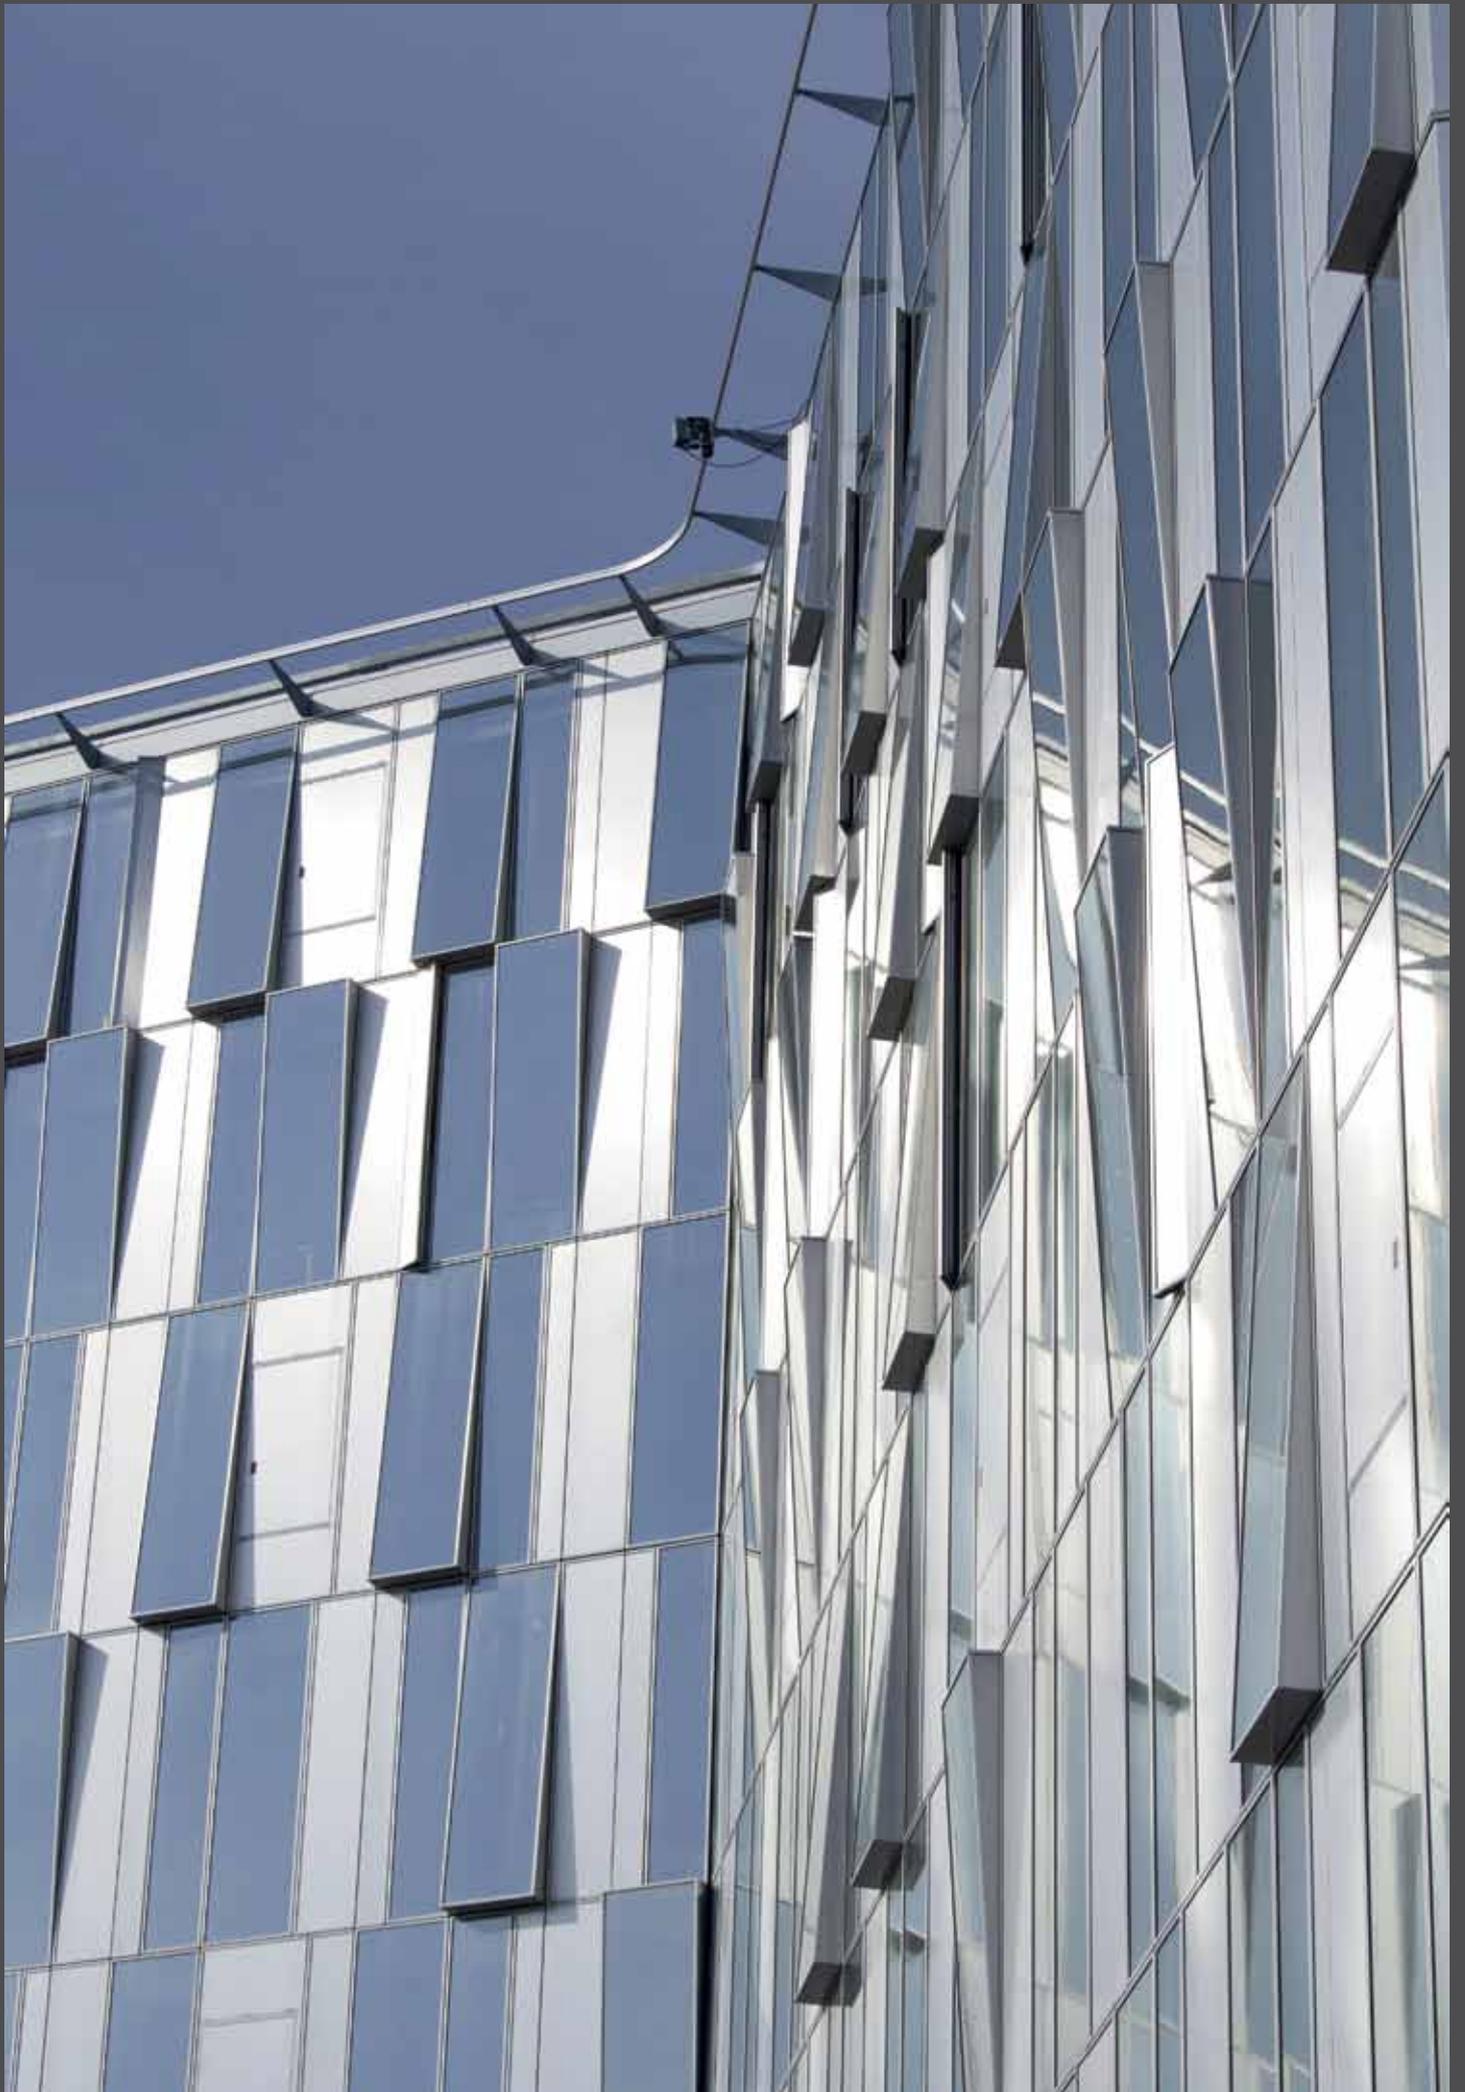

The Real Thing

ALUCOBOND® naturAL surfaces amplify the natural beauty and character of aluminium to enhance the design of your architectural project. It comes in a variety of finishes, all of them reinforcing the pure metal look, creating shiny, highly reflective and bright appearances. Its finely textured surface scatters light for visual effects from up close, while retaining the look of smooth aluminium from afar.

And, as usually with any ALUCOBOND®, it allows freedom of design to realise your vision.

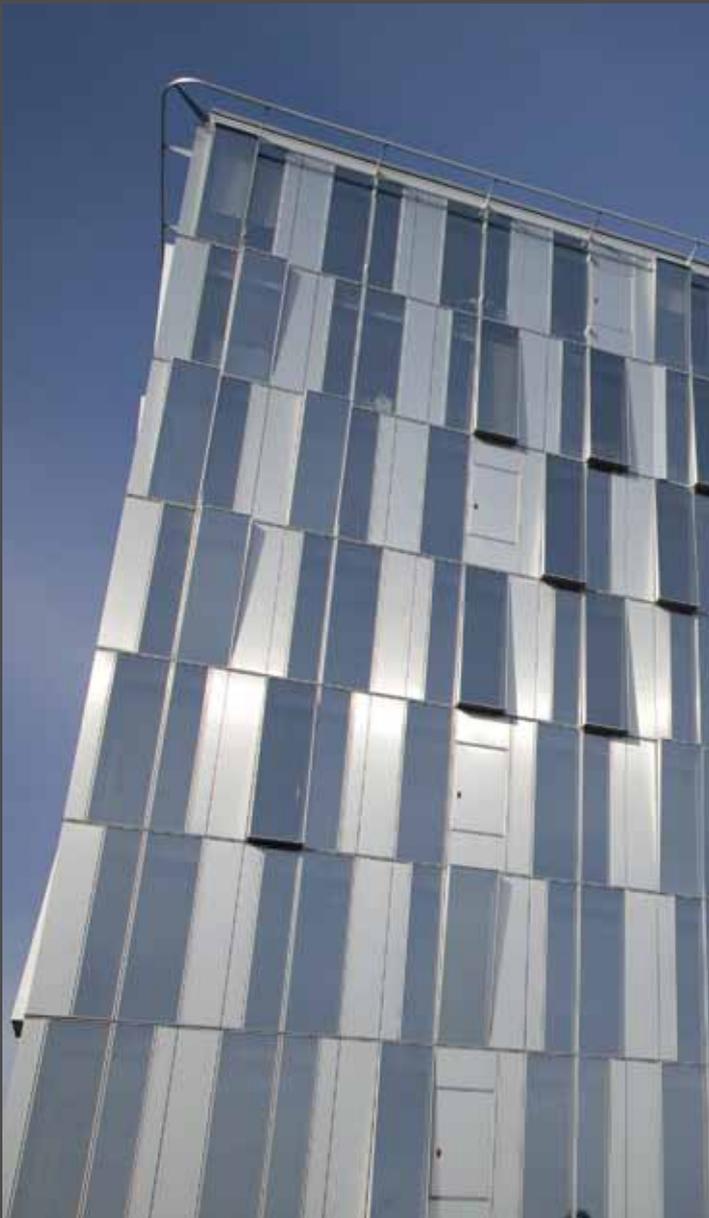

And again, as usually with any ALUCOBOND®, it is highly durable and lasting across the globe from Canada to Middle East and New Zealand.

Authenticity

The ALUCOBOND® naturAL series really is aluminium at its purest. As with any natural material, appearance changes from close to far and varies with viewing angles. ALUCOBOND® naturAL is no different in this respect and helps you to create a variety of impressions from one and the same building and therefore bring it to life.

Lot C | Malaysia | Architect : AQidea Architects | naturAL brushed

Technopark Siemens | Germany | Architect: Brückner & Brückner Architekten | naturAL brushed

The Crown Metropol Hotel | Australia | Architect: Bates Smart | naturAL brushed

Bull Massy | France | Architect: Axel Schoenert Architectes Associes | naturAL brushed

Child day care Center | Germany | Architect: Bauernfeind Architekten | naturAL brushed

Patinoire des Vernets - Ice skating ring | Switzerland | naturAL brushed

Hard to Tell

ALUCOBOND® naturAL brushed is almost a twin to stainless steel - it's really hard to tell, close yet unique. While purely an aluminium surface, its rougher and deeper brushing create a slightly darker look. Especially when curved, which it can be as easily as all ALUCOBOND®, we believe its true character emerges. While the flat panel shines brighter, the curved application displays more maturity and luxury.

Tuanku Mizan Zainal Abidin Mosque | Malaysia | Architect: Kumpulan Senireka Sdn. Bhd. | naturAL brushed

La Cigale Hotel | Qatar | Architect: Khatib & Alami | naturAL brushed

Spire Healthcare | UK | Architect/Planner: CSM- Keith Willis | naturAL Copper

Blairderry Road | UK | Architect/Planner: MIB | naturAL Zinc

Have it your way

ALUCOBOND® naturAL is available as ALUCOBOND® or ALUCOBOND® plus (ALUCOBOND® A2 on request). It allows the same freedom of design and shaping as all ALUCOBOND® does, allowing for ease of handling and efficient solutions for your clients.

Calibrated Colours | Sri-Lanka | Architect: Muditha Jayakody Associates | naturAL brushed

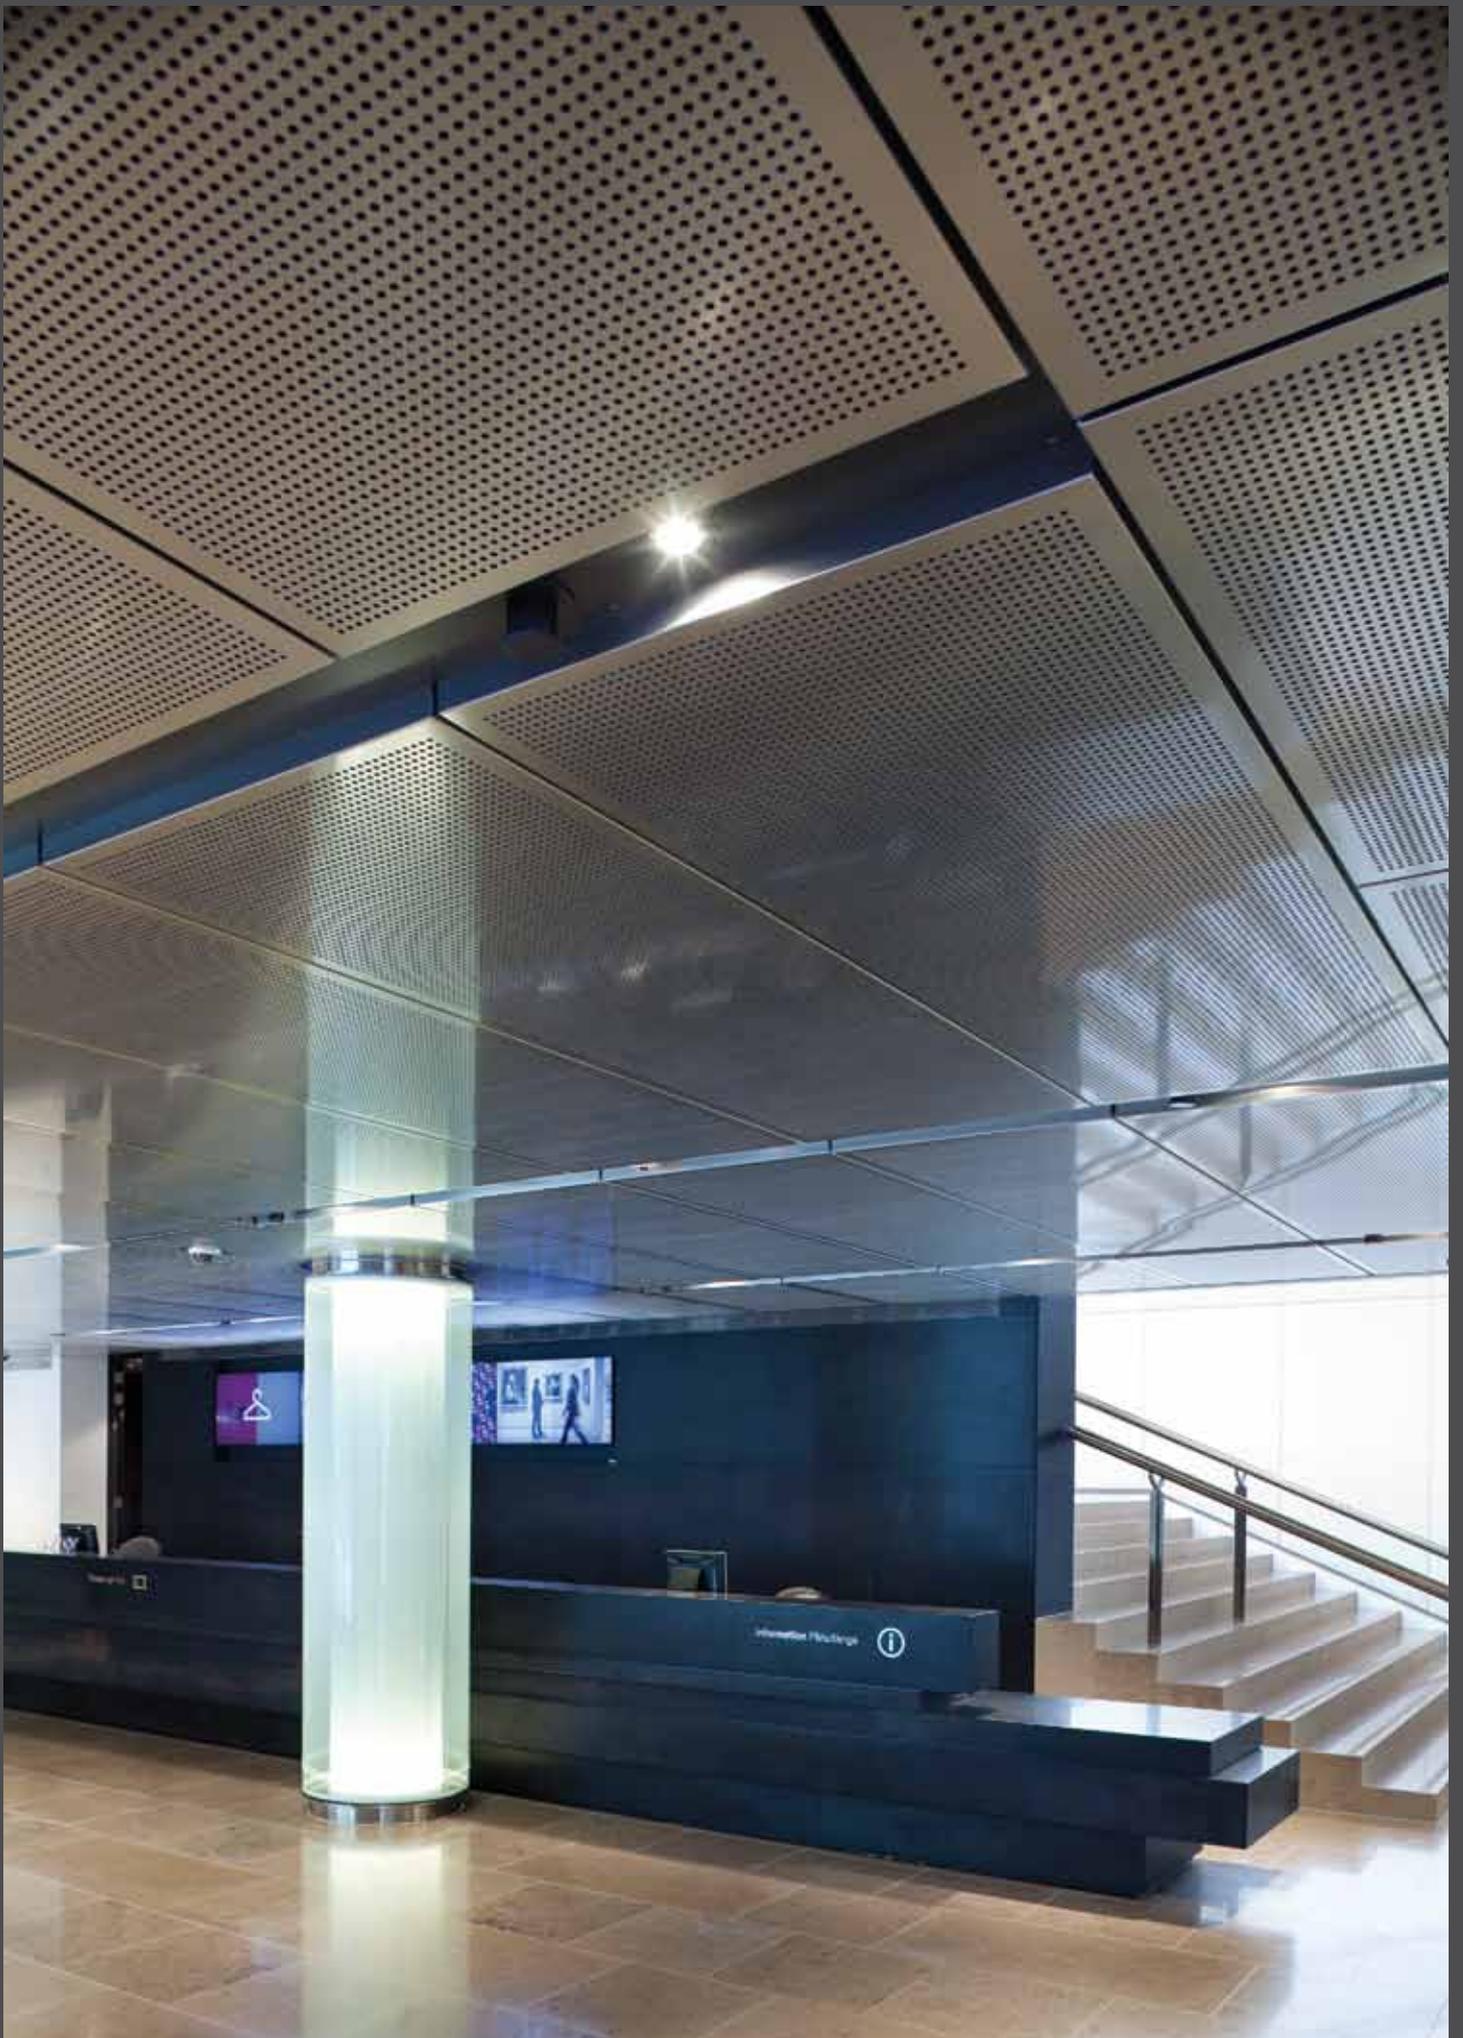

Paläon, Schöninger Speere | Germany | Architect: Architekturbüro Holzer Kobler Architekturen | naturAL reflect

APPLICATION INFORMATION

To avoid possible reflection differences, panels must be installed in the same direction as marked on the protective peel-off foil.

All aluminium alloys have minute variations that occur during the production process. Additionally, the rolling direction of the ALUCOBOND® naturAL surface structure affects how light is reflected. Such effects cause subtle differences in colour and sheen and are common for all natural, non-coil coated metal surfaces. In order to minimize these variations in colour and appearance, all ALUCOBOND® naturAL aluminium composite panels for a project respectively an elevation of a project should originate from the same batch (see labels on the pallets). Furthermore, panels should be installed in the same direction as marked on the protective peel-off foil. However, 100% uniformity in colour and brightness of such a natural surface is not feasible. We will be pleased to advise you on the special characteristics of ALUCOBOND® naturAL surfaces.

For more information and available specification please refer to the manufacturer or your nearest ALUCOBOND® representative.
