

ALUCOBOND®

Wood and Stone look

NATURE'S OWN COLOURS

Wood Look

ALUCOBOND® Wood Look is available in many modern wood patterns. It offers the same unequalled material properties for which all ALUCOBOND® products are known for; extraordinary flatness and rigidity, excellent formability, low weight and outstanding weather resistance for exterior and interior cladding applications. The use of a high quality paint system applied in a continuous coil-coating process ensures that the Wood Look is not compromised for many decades to come. These patterns are available in 1000, 1250, 1500 & 1575mm widths.

Stone Look

The versatile aluminum composite panels are now available with a variety of Stone patterns. Thanks to a special coating process, it is possible to reproduce brilliant surfaces with a natural stone pattern. The high quality standard of the continuous coil-coating method guarantees excellent durability of the PVDF coating even under extreme weather conditions. Stone look combines all the advantages of ALUCOBOND® technology and is processed just as easily all other ALUCOBOND® panels. These patterns are available in 1000, 1250, 1500 & 1575mm widths.
